LAST QUARTER AT

GML

In February, Amy headed to Spelle in Germany to visit the Krone factory and visitor centre. During the trip, Amy took part in Krone's first-ever marketing training and learnt all about the proud history of the Krone family and brand. Amy also toured the full factory, getting a behind-the-scenes look at how every machine is built from the ground up.

At the end of March, we were delighted to welcome the CFMOTO Product Development team from China to our depot and surrounding farms. The visit gave them a valuable first-hand insight into what farmers are really looking for in their machines, helping to shape the next generation of CFMOTO models to better meet their needs.

Ben, one of our most experienced Agricultural Technicians, also had the opportunity to travel to France this month, where he visited the Kuhn Training Centre. During his time there, Ben focused on the large square baler range, gaining valuable knowledge to prepare him well for the busy season ahead, no doubt it will be here before we know it!

FETF GRANTS AVAILABLE FOR CHAPMAN MACHINERY
